WORK EXPERIENCE

- **Full-stack Software Engineer at TradeDepot Inc: August 2018 – August 2019**
 - Led the development of a retailer focused e-commerce platform using React and Node. Currently serving retail outlets across the country.
 - Part of a horizontal team that built an exclusive, invite-only, offline first, retail platform using service worker technologies to ensure offline functionality and React for server-side rendering to ensure functionality on older browsers and low-end mobile phonesProducts: [SlashClub](#), [ShopTopUp](#)
- **Frontend Web Developer at Metro Africa Xpress(MAX): November 2017 – August 2018**
 - Part of a team that built a real-time rider tracking platform for monitoring riders during trips.
 - Led the re-development of the web delivery platform using React and Service workers to enable offline functionality on mobile phones.

- Worked closely with the design team to ensure that the final products met all specifications.
- **Web Developer at Naijalogos: May 2015 – May 2017**
 - Spearheaded the engineering team and mentored junior developers on JavaScript and Web Application Development
 - Responsible for code review and testing to ensure quality.

PROJECT EXPERIENCE

- **Package Manager App**
 - An app that provides a GUI for managing package.json files.
 - Users can update versions of dependencies.
 - It can be used to manage multiple projects.
 - Built using React and Electron.
 - State management using the Context API
 - Manage packages by running NPM commands.
 - Available on [Github](#).
- **Angular Epic Spinners**
 - A set of reusable Angular loading indicator components.
 - Built using Angular.
 - Available on [Github](#).
 - Published to [NPM](#).
- **GH Devfind**
 - An app that finds developers on Github that are available for hire.
 - Built using React and Apollo GraphQL.
 - State management using Context API.
 - Available on [Github](#).
